

ARCHITECT

Environetics seeks an architect with 1-3 years of experience to manage the technical development of design solutions and lead the documentation and construction administration efforts of a multi-disciplinary team.

Proficiency in the following is required:

- Develop schematic design to design development to construction documentations
- Assist PM/RA in design schedules, cost estimation, client liaison
- Utilize SketchUp AutoCAD, Rhino, and Adobe Suite
- Fluent REVIT experience. Must be able to put a full construction drawing set together and produce renderings
- Review "Red-line" construction & shop drawings

Education and Requirements

- BS Architecture or equivalent professional degree
- LEED AP or interest to achieve

Because they will join a highly collaborative, interdependent team, we seek candidates that demonstrate:

- Professionalism
- Creativity
- Teamwork
- Comfort with Evolving Technology
- Ability to Communicate

Environetics is a highly integrated A/E/I firm focused on creating real value for our clients through intense collaboration and attentive service. We are a growing firm with strong opportunity for professional growth and mentorship within a caring and entrepreneurial work environment. We are looking for team members that will make a real difference.
